

DRONE EFFECTORS

Modular, Scalable, Platform-Agnostic & Multi-Role

Highly Customisable & UAV Agnostic

Charges are easily customised to meet your target effect, size and weight requirements, while integrating seamlessly with any UAV.

Projectile options:

EFP | JFC | Fragmenting | Incendiary | Dual Purpose

Enhanced Safety

The Electronic Safe Arming & Firing Unit (ESAFU) uses MAVlink communication, incorporating multiple physical and electronic safety mechanisms and firing inputs for robust and versatile operation.

Proven, Patented Versatility

User-fillable with readily available plastic explosive and standard electric detonators.
Factory-filled options available for high-volume deployment.

Rapid Design & Production

Our established infrastructure ensures agile design and production timelines.

Based on our globally deployed and field-proven shaped charge technology, Gladius-SP drone effectors offer a highly effective and reliable solution.

Designed for drone-agnostic integration, our charges are easily customised to meet your requirements.
